

# TLAP IN FOCUS

## A SNAPSHOT OF 2017/18

### We are making an impact by:

- working through partners and networks to deliver front line operational support
- mobilising leaders and decision makers to contribute at strategic level to system change
- showcasing examples that deliver transformational outcomes
- championing co-production, ensuring that the people who use services, families and carers are working at the heart of our programme via the National Co-production Advisory Group (NCAG).
