

Innovations in health and social care

Think Local Act Personal (TLAP) is collecting examples of innovative models of health and social care for an online directory.

We know there are some great examples of person and community approaches that are making a big difference and having a positive impact on people's lives; we want to gather as many of these approaches as we can and develop an online resource that can be used by commissioners, providers and people with lived experience.

This work builds on the *six innovations in social care* initiative. This document presents information with short summary templates, which TLAP will also use.

As well as adding examples of innovation to the online directory we will be looking to promote individual models of innovation in our regular e-bulletin.

Please complete your short summary with 100-150 words per section and return to info@tlap.org.uk to be added to the online directory.

1) Organisation**2) What is the problem this innovation solves?****3) Solution**

4) Evidence base**5) Expected impact****6) Stage/spread** (where it is/how much is there?)

7) What would councils/health organisations/local areas need to do or have in place to enable it to happen?

8) What would kill it?

9) Where to go for more information
